

Libecyde Phase Proposal

Data Flow Items

① Config

- PLC Platform
- PLC Code Standard
- HMI Platform
- HMI Standard
- Design Document Standard
- Architecture
 - I/O types
 - Network types
 - I/O address mapping schema

② Client Info

- Architecture
- PIDs
- Device List
- I/O Allocation

③ AEM import

- Area Model
- Module List
 - UID
 - size
 - Resources

④ HLD

- Module Definitions
 - Name
 - Desc
 - Location
 - PI definition
 - Params definition

⑤ DD

- PDB → DDS
 - Tag List
 - Tag properties
 - Set up DDS
 - Resources
 - Class/Instance
 - Tracks initial set
 - FM's initial items

⑥ DDS → PDS

- Module updates
 - PI
 - Param
 - Resources
 - Sharing

⑦ Code Generation

- Detail Queries
- Device Types
- Location
- Tag Types

⑧ PLC

- Devices
 - Base Tags
 - I/O Tags
 - IO Logic
 - IO Tree
- Area Model
- Program Structure
- Modules
 - Base Tags
 - Support Tags
 - PI
 - Params
 - Tracks
 - Flags

- Tag Values (DDE or via xmr)
 - Initial/Default values
 - Configuration values

- P2P

- Config
- Tags
- Logic
- Mapping
- alias Tags
- logic

⑧ HMI

- Config
 - Folders (RSV)
 - Alarm Groups (Intouch)
 - Other (HMI st's dependant)
- Devices
 - Tags
 - Modules
 - Tags
 - Set points
 - Other (HMI st's dependant)

⑨, ⑫ Testing

- Test scheduler
- Results

⑩ Duplication

- Tag Duplication updates

⑬ Install

- IO check out schedule

⑭, ⑮ Reports & RPI's

⑯ Progress Tracking & reports Task Lists
